PROFESSIONAL SUMMARY

Software Developer with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and scalable software development. Experienced in building backend services using Java, Spring Boot, Node.js, and AWS, with hands-on experience in asynchronous systems, REST APIs, and cloud-based applications. Passionate about solving complex problems and developing high-quality software in collaborative Agile environments.

TECHNICAL SKILLS

Languages: Dart, Java, Python, JavaScript, TypeScript, C(basic),c++(basic) ,Object-Oriented Programming(OOP)
Web & App Development: Flutter, React.js, Node.js, Django, HTML5, CSS, REST API , Spring Boot
Databases: Firebase, MongoDB, MySQL
Artificial Intelligence: Machine Learning, Generative AI
Tools & Platforms: Figma, Adobe Photoshop, Android Studio, Linux, Windows, Git , aws
Cloud & DevOps: AWS (EC2, S3 – basic), Docker, CI/CD basics

EXPERIENCE

AventIQ | Software Developer Intern **Jul 2026 - oct 2026**

- Developing and maintaining real-world, deployed applications using Node.js, Flutter, and Electron, contributing to production features, RESTful API integrations, debugging, and performance optimization.
- Integrated AWS S3 and Lambda for scalable cloud storage and serverless processing, supporting reliable backend workflows and production deployments.

Webdesino | Full Stack Developer **Mar 2025 - Sep 2025**

- Designed, developed, and optimized web applications using MERN Stack and Django, enhancing functionality, user experience, and business operations.
- Delivered production-ready solutions including E-Bulkwala, LandSathi, MachinoIndia, and DucoArt with payment gateway integration, admin dashboards, and third-party library support.

PROJECTS

FinixBooks | Node.js, React.js, Express, MongoDB, Electron **Aug 2026**

- Designed a server-authoritative ERP architecture with a unified MongoDB voucher schema for 8+ transaction types, append-only financial records, and integer-paise precision for accurate monetary calculations.
- Built a transactional posting engine with balanced ledger validation, automated GST splits, atomic voucher sequencing, idempotency checks, multi-tenant data isolation, and role-based access control (RBAC).
- Built an Electron-based Tally sync bridge and a Flutter ERP app with 38+ screens, financial reports, AR/AP aging, and OCR-assisted invoice processing with server-side validation.

Rental Application Platform | Flutter, Node.js, MongoDB, AWS S3, Redis **Jan 2026**

- Developed a rental marketplace with real-time item listings, Gmail OTP authentication, and AWS S3-based media storage for user onboarding and item management.
- Implemented Redis-based message queues and background workers for asynchronous task processing, decoupling long-running operations from request handling.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ coding problems on LeetCode and GeeksforGeeks.
- AWS Certified Cloud Practitioner — Amazon Web Services (AWS).

EDUCATION

Sharda University **2023 – Present**
B.Tech in Computer Science and Engineering | ***CGPA: 8.0***
