PROFESSIONAL SUMMARY

Motivated Flutter App Developer with hands-on experience in building responsive mobile applications using Flutter and Dart. Skilled in backend development, Firebase, REST APIs, database management, and basic AWS services, with a strong understanding of UI/UX and app optimization. Quick learner with strong problem-solving and teamwork skills.

EDUCATION

Sharda University **2023 – 2027**
B.Tech - Computer Science and Engineering - ***CGPA - 8*** *Greater Noida, IN*

EXPERIENCE

Webdesino | Role - Full stack **Mar 2025 - Sep 2025**

- Developed and enhanced the company website functionality, improving user interaction and engagement while expanding online reach to deliver a better customer experience.
- Developed a full-featured web application using MERN stack and Django, leveraging open-source libraries and integrating a payment gateway with a comprehensive admin panel to enhance user experience.
- Built and deployed web applications: DucoArt, LandSathi, MachinoIndia, E-Bulkwala.

Intern at The Jacobin | Role - UI/UX Designer **Sep 2023 - Nov 2023**

- Gained hands-on experience in developing, implementing, and maintaining user interfaces for mobile and web platforms.
- Designed and tested UI/UX prototypes for mobile applications, optimizing workflows for different user types to improve usability and task efficiency.
- Collaborated with cross-functional teams to deliver design assets for live projects, streamlining development processes and ensuring a seamless user experience.

PROJECTS

Food Delivery App | Flutter, Firebase **Mar 2024**

- Developed a modern food delivery mobile application using Flutter with a clean and responsive UI for learning and practice purposes.
- Used Firebase Firestore to store and manage food item data with real-time updates in the application.
- Designed intuitive screens for food browsing, cart management, and smooth navigation to enhance user experience across devices.

Rental Application Platform | Flutter, Node.js, MongoDB, AWS S3, Redis **Dec 2025**

- Developed a full-stack rental platform using Flutter and Node.js with MongoDB, enabling users to list, browse, and rent items with real-time availability .
- Integrated AWS S3 for scalable media storage and implemented Gmail OTP-based authentication, ensuring secure and efficient handling of user data and images.
- Built an asynchronous processing system using Redis as a message queue and worker processes, enabling scalable background task execution and improving system performance.

TECHNICAL SKILLS

Languages: Dart, Java, Python, JavaScript, TypeScript, C
Web & App Development: Flutter, React.js, Node.js, Django, HTML5, CSS, REST API , Spring Boot
Databases: Firebase, MongoDB, MySQL
Artificial Intelligence: Machine Learning, Generative AI
Tools & Platforms: Figma, Adobe Photoshop, Android Studio, Linux, Windows, Git , aws
Cloud & DevOps: AWS (EC2, S3 – basic), Docker, CI/CD basics

CERTIFICATIONS

- Flutter Developer — Udemy (Oct 2024)
- React.js Marathon Course — The DevTown (Sep 2023)
- MERN Stack — 30DaysCoding (Jul 2024)
- Data Structure — Apna College (Feb 2024)
- GenAI — Udemy (May 2025)
- Participated as Web Developer in Literary Society events

EXTRACURRICULAR

- Active problem solver on LeetCode and GeeksforGeeks
- Engage in creative projects and personal tech experiments, focusing on mobile app development
- Play cricket regularly as a team sport on weekends
